

AI Hiring Readiness Scorecard

HarmiRecruit · Score 8 parameters · Map gaps to ROI · Demo only what closes the gap

COMPANY	PERSONA	DATE	SCORER

Score each 1–5 (1 = painful / manual, 5 = ready / disciplined). Total /40 → tier below. Circle score live; note the gap in 'Module' column.

#	PARAMETER / QUESTION	SCORE	HARMIRECRUIT MODULE
01	Data hygiene Where do candidate resumes and profiles live today? 1 = Scattered (drives/WhatsApp/email) → 5 = One searchable system	① 2 ③ 4 5	AI Resume Parser + Careers apply
02	Channel discipline Where do recruiter–candidate chats happen? 1 = Personal WhatsApp / mixed → 5 = Org inbox, auditable	① 2 ③ 4 5	WhatsApp inbox (Meta API)
03	Screening consistency How are candidates shortlisted for a role? 1 = Gut feel / keyword scan → 5 = Structured score vs JD	① 2 ③ 4 5	AI Match Score /10
04	HM collaboration How do hiring managers see pipeline status? 1 = Chase recruiters / status calls → 5 = Live shared pipeline	① 2 ③ 4 5	HM dashboard + scorecards
05	Follow-up ownership Who owns candidate nurturing from offer → Day 90? 1 = Ad-hoc / often drops → 5 = Milestones + ownership	① 2 ③ 4 5	Follow-up engine + AI scripts
06	AI trust Would your team use AI drafts if every suggestion is editable? 1 = Low trust / blocked → 5 = Human-in-the-loop OK	① 2 ③ 4 5	WA replies · JD · screening Qs
07	Measurement Do you track source → submit → interview → select → join? 1 = Partial / anecdotal → 5 = Funnel + recruiter KPIs	① 2 ③ 4 5	Analytics + leaderboard
08	Scale pressure Can current headcount absorb next quarter’s hiring volume? 1 = No — burnout / backlog → 5 = Yes — with better tools	① 2 ③ 4 5	AI layer across every seat

TOTAL SCORE / 40

8–18 · Manual

Spreadsheet + personal WhatsApp

19–28 · Tool-ready

Have process; AI still optional

29–40 · AI-ambitious

Ready for governed AI scale

Next: pick the 3 lowest scores → demo only those modules → fill ROI with their numbers.

Persona Talk Tracks

Owner · CHRO / VP HR · HRBP · CTO / IT — match the room, then run the scorecard.

Call flow: 2-min pain → scorecard live (5 min) → name tier + 3 gaps → demo those modules → leave ROI sketch → propose 30-day pilot.

Owner / Agency Head

Outcome: more joins with the same team — prove margin, not features.

- Open: “If hiring volume rises 30%, do you hire more recruiters — or make each closer?”
- Probe: cost per join, ghosting before DOJ, hours lost to resume dump + WhatsApp chase.
- Bridge: “HarmiRecruit is the closer layer — parse, match, WhatsApp, Day-90 follow-up.”
- ROI ask: hrs/recruiter/week on admin × cost; join-rate lift × contribution per join.
- Close: 30-day pilot on 1 desk / 1 job family; KPIs = time-to-shortlist, response SLA, joins.

HRBP

Outcome: less firefighting between HMs and recruiters — visibility without chasing.

- Open: “What do HMs ping you for every week that a live pipeline should answer?”
- Probe: req chaos, interview no-shows, unclear ownership after verbal offer.
- Bridge: “HM dashboard + WhatsApp invites + follow-ups cut the status theatre.”
- ROI ask: HM wait time, no-show rate, days from shortlist → interview.
- Close: run discovery with one frustrated HM present — let them score Q4 & Q5 live.

CHRO / VP HR

Outcome: consistent quality of hire, process fairness, manager experience.

- Open: “Where does quality of hire break — sourcing, screening, or offer-to-join?”
- Probe: scorecard consistency, bias risk, HM satisfaction, offer drop-off.
- Bridge: “Structured Match Score + editable AI drafts = speed without black-box decisions.”
- ROI ask: fewer wasted interviews; higher accept/join; less replacement cost.
- Close: pilot with one business unit; review bias/override controls with you before scale.

CTO / IT

Outcome: safe AI adoption — data control, integrations, WhatsApp compliance.

- Open: “What’s blocking AI in hiring today — security, data residency, or shadow tools?”
- Probe: Meta WhatsApp API, resume storage, SSO/roles, export, audit trail.
- Bridge: “AI assists; humans send. Org WhatsApp + role-scoped data beats personal chats.”
- ROI ask: reduce shadow WhatsApp/risk; one system vs brittle spreadsheet + tools sprawl.
- Close: share security one-pager + sandbox tenant; IT reviews before CHRO rollout.

FAST OBJECTIONS

“We have an ATS” → ATS stores; HarmiRecruit closes (WhatsApp + AI + follow-up). “AI is risky” → every draft editable; humans send. “Team won’t change” → start with resume parse + Match Score (day-one win). “Not now” → leave scorecard; book review when Q7–Q8 pressure spikes.
